Notice to shareholders of the sub-fund CPR Invest – Global Silver Age

Luxembourg, November 22nd, 2016

Dear Shareholder,

The members of the Board of Directors (the "Board") of CPR INVEST, an investment company with variable capital incorporated under the laws of the Grand Duchy of Luxembourg, and governed by Part I of the law of 17 December 2010 on undertakings for collective investment (the "Company"), hereby inform you of the following amendments to the Company's prospectus dated May 2016 (the "Prospectus"):

Amendment of the appendix related to the sub-fund « CPR Invest – Global Silver Age » (the «Sub-Fund »)

1. Amendment of the investment objective and policy of the Sub-Fund

The appendix related to the sub-fund "CPR Invest – Global Silver Age" is amended in order to reflect the fact that this Sub-Fund will cease to be a feeder sub-fund of a master fund and will then be managed in direct. As a result, the investment objective and policy of this Sub-Fund are amended as follows:

“Investment Objective

The Compartment's objective is to outperform global equity markets over the long-term period (minimum of five years) by taking advantage of the dynamics of international securities associated with the ageing of the population.

Investment Policy

The investment strategy of the Compartment consists in taking advantage of a major demographic trend, namely the ageing of the population. The objective is to select the best-performing international securities (in particular the USA, Canada, Europe in the geographical sense, Japan, Hong Kong and Australia) in various sectors that may benefit from the ageing of the population (pharmaceuticals, medical equipment, savings, leisure activities, dependence, security, well-being, automobile, etc.) based on criteria for fundamental and quantitative analysis, liquidity, and market capitalization. In the context of this theme, the Compartment may also be exposed up to 25% of its assets in securities from emerging countries. The Compartment management process is based on a combined approach, namely a top-down sectorial allocation process, and a bottom-up stock selection process. The Compartment's equity exposure will be between 75% and 120% of its assets.

Through its construction, the Compartment totally excludes some sectors and securities that are not related to its theme, and is therefore likely to show significant performance differences compared with a global equity index (e.g. MSCI World), including over relatively extended time periods.
